

Make every interaction count.

A six-week discovery and pilot programme to create a consistent service journey. The proposal brings customer research, guided conversations and human support into one measurable experience. This is an illustrative proposal, not a contract.

06 / WEEKS

03 / DELIVERY PHASES

01 / SHARED ROADMAP

The opportunity

Reduce repetitive enquiries and make complex requests easier to complete. Start with one high-volume service, establish a baseline and improve the experience through a small, measurable pilot.

How we deliver

Weeks 1-2 / Discover: interview teams and map the current journey.

Weeks 3-4 / Build: prototype the flow, content and handoff process.

Weeks 5-6 / Pilot: test with users, review outcomes and refine.

How success is measured

Track completion rate, time to resolution and customer feedback. Compare pilot results with the baseline, document accessibility findings and agree which improvements should move into the next release.

LET US START

Confirm your service owner and arrange a 45-minute discovery workshop.
